STICK

ASSEMBLY INSTRUCTIONS

1. Print this template on matte photo paper or card stock.
2. Use a thin layer of white glue for gluing.
3. For nice clean folds, score dashed fold lines by very lightly running an x-acto knife along a straight edge.
4. Check local regulations and laws to make sure use of papertoys is not prohibited in your area.
5. Glue "HEAD CONE" around into cone shape.
6. Glue "BODY" into cylinder shape. Fold tabs A out.
8. Put glue on white side of tabs A and glue "BODY" inside of "HEAD CONE."
9. Fold "STICK" into a square tube. Place glue on long tab and fold tube flat so you can press it flat to glue tube together and then pop it out into a tube.
10. Glue "STICK" into inside of "BODY" where marked.
